

MEBA CUTTING OIL

MEBA MIST OIL

ENHANCED TOOL LIFE LOW SMOKE

CUTTING OILS & MIST OILS

THE SCIENCE OF A PERFECT CUT

At MEBA India, we understand that your cutting medium Must work in harmony with your cutting. Tools for Enhanced production & life our specially formulated Lubricants are designed to:

- **Extend Blade Life:** drastically reduce friction and heat buildup.
- **Superior Surface Finish:** achieve smoother cuts and Tighter tolerances.
- **Corrosion Protection:** protect both your workpiece and Your machine components.
- **Eco-friendly & Safe:** formulated to be skin-friendly and Biodegradable.

MEBA Uni mist: PRECISION LUBRICATION. PEAK PERFORMANCE.

Unlock the full potential of minimum quantity lubrication with MEBA Uni mist. Engineered for the demanding Indian manufacturing sector, this non-water-miscible fluid is the ultimate solution for both cutting and forming operations.

- **Extreme Pressure (EP) Excellence:** Advanced additives ensure maximum tool life even under high-stress punching and bending.
- **Superior Surface Finish:** Achieve "first-time-right" quality with enhanced lubricity.
- **Clean & Green:** A residue-free formula that is 100% free from chlorine and heavy metals.
- **Operator Safety:** High flash point technology significantly reduces fumes and mist, creating a healthier workspace.
- **Viscosity [mm²/S] at 40 °C:** High flash
- **Flash Point [°C]:** ≥265
- **Materials to be Processed:** Low alloy Steel, Aluminium, Ferrous and Non-Ferrous Metals

MEBA General Cutting

MEBA offers a specialized range of high-performance cutting fluids designed for precision sawing and Machining. This formulation is specifically engineered for minimal consumption systems, ensuring A clean, "stain-free" machine environment while maintaining maximum tool life.

- **Material Versatility:** Optimized for the high-demand machining of Cast Iron, SG Iron (Ductile), and Steel.
- **Anti-Discolouration Formula:** Developed with a low tendency for discolouration in CI (Cast Iron) machining, ensuring workpieces and machine surfaces remain bright and residue-free.
- **High-Film Lubrication:** Provides a superior lubricating film that reduces friction, heat, and tool wear even at ultra-low flow rates.
- **Advanced Corrosion Shield:** Possesses excellent corrosion protection properties, safeguarding machine beds, guides, and finished parts from oxidation.

MEBA Cutting Oil (Water Soluble)

The versatile powerhouse for heavy-duty Metal sawing. Designed for high-pressure Environments, this oil creates a stable Emulsion that provides exceptional cooling And lubrication.

- **Application:** Ideal for high-speed circular saws And heavy-duty band saws.
- **Key Benefit:** High wash-away effect for chips, keeping The cutting area clean.
- **Efficiency:** Highly concentrated for maximum economy.

MEBA MIST OIL (Uni Mist)

The precision choice for clean, dry cut environments. Our Mist Oil is engineered for advanced Uni Mist systems, delivering a fine aerosol directly to the tooth tip.

- **Application:** Best for CNC systems and automated production lines.
- **Key Benefit:** Leaves the workpiece almost dry-eliminating the need.
- **Efficiency:** Uses drops instead of liters, significantly reducing consumption costs.

MEBA Range

MEBA CUTTING OIL	PKG.	MEBA MIST OIL	PKG.
MEBA-Uni Cool	20Ltr.	MEBA Eco Mist	5/26Ltr.
MEBA-Pyro Cool	20Ltr.	MEBA Uni Mist	5/26Ltr.
		MEBA SS Mist	5/26Ltr.
		MEBA NoFerro Mist	5/26Ltr.

MEBA
sawing solutions.
